1 Introduction

This is a book created from markdown and executable code.

See Knuth (1984) for additional discussion of literate programming.

2.1 Results

In this section, we will present our analysis results using data from a study on volunteering (Cowles and Davis 1987). This data is available in the car data package (Fox, Weisberg, and Price 2022).

2.1.1 Descriptive statistics and plots

First, we will look at descriptive statistics and visualizations of the data.

Table 2.1: Volunteering Counts by Sex

sex	volunteer	n	Percent
female	no	431	55.26
female	yes	349	44.74
male	no	393	61.31
male	yes	248	38.69

Sed dignissim sem a mi ultricies dignissim. Nulla mattis lorem sit amet enim convallis porta. Duis dui ligula, ornare ut ex non, aliquet mattis libero. Ut congue ipsum cursus est euismod rutrum. Curabitur porttitor nibh sit amet urna ornare lobortis. Nullam commodo, enim sit amet

2.1.2 Do personality scores differ for those who do and do not volunteer?

Independent t-tests were used to determine whether personality scores differed by whether participants volunteered or not.

Extraversion differed between those who volunteered ($\Delta M = -0.98$, 95% CI $[-1.39, -0.57]$, $t(1270.12) = -4.69$, $p < .001$). As shown in Table 2.2, volunteers were more extraverted on average than those who did not volunteer.

However, scores on neuroticism did not differ between groups ($\Delta M = -0.13$, 95% CI $[-0.64, 0.39]$, $t(1256.24) = -0.47$, $p = .636$).

Figure 2.1: Distribution of extraversion scores by volunteer status and sex.

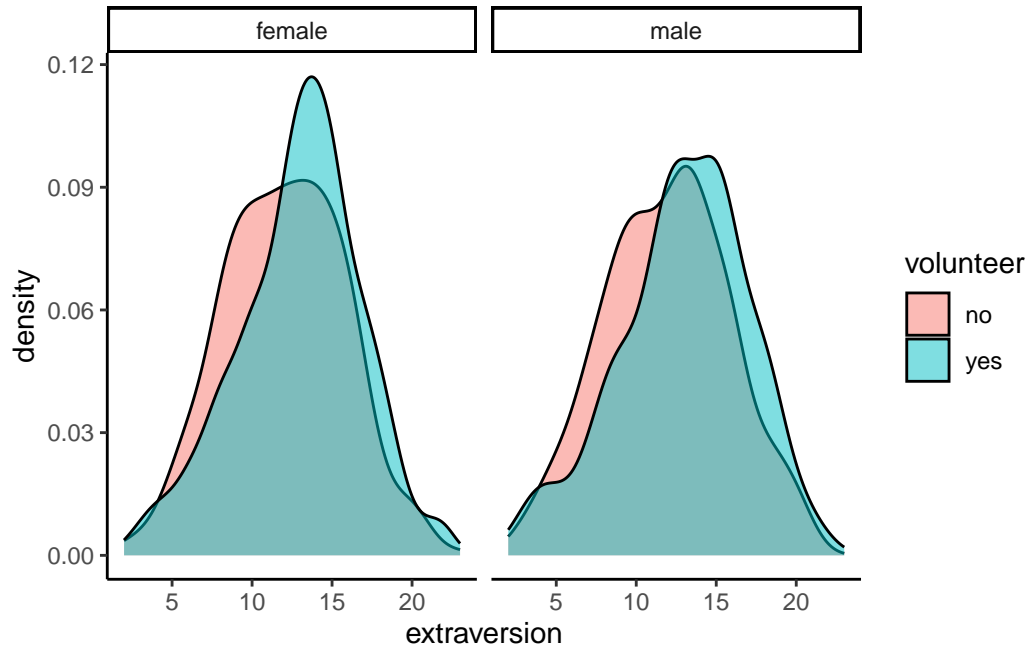

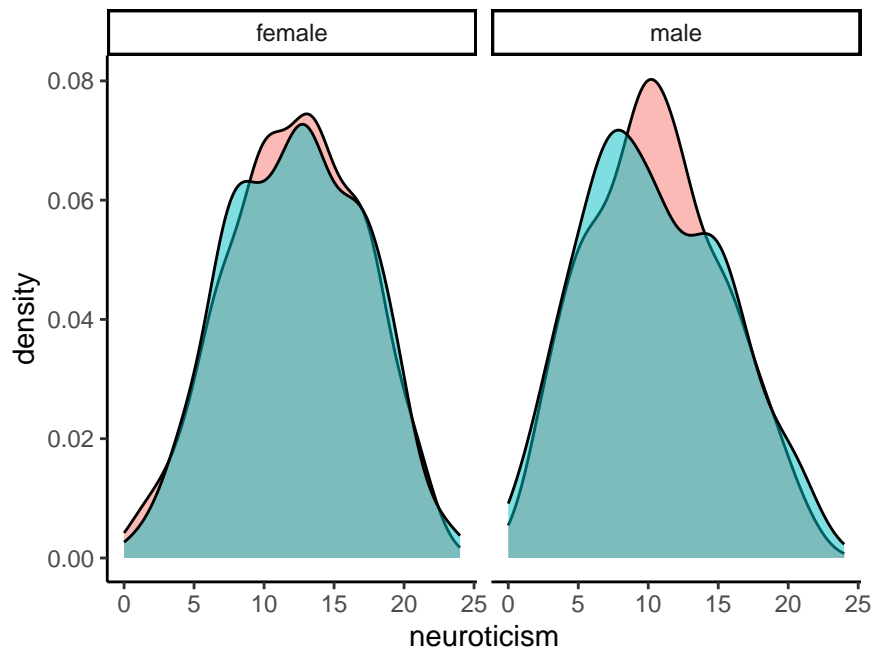

Figure 2.2: Distribution of neuroticism scores by volunteer status and sex.

2.1.3 What is the relationship between extraversion and neuroticism in this sample?

Do these scores correlate in this sample in the same way for volunteers and non-volunteers?

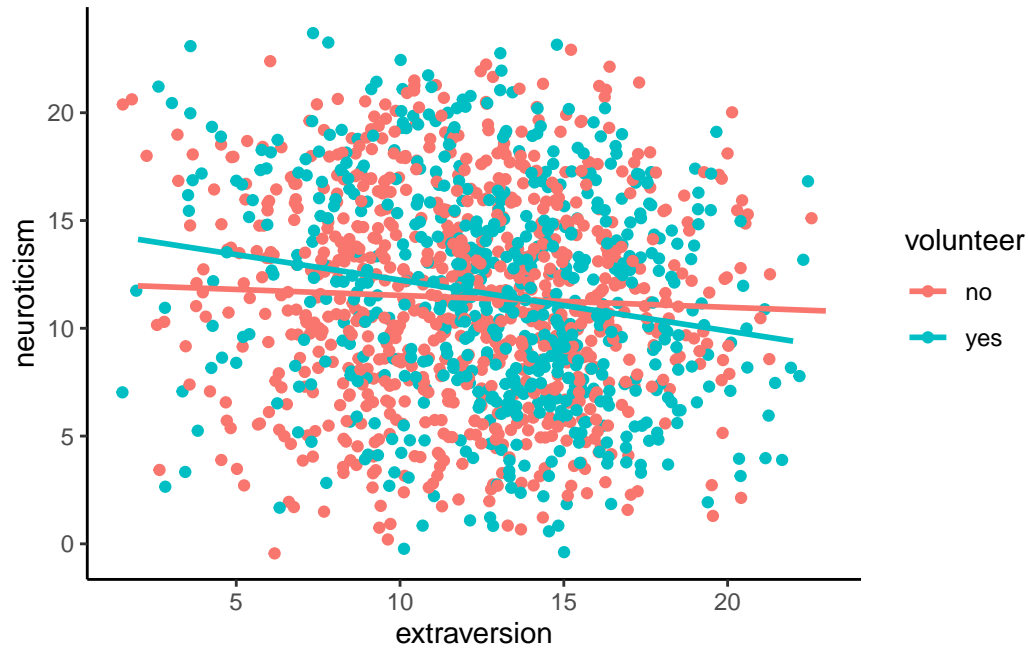

Figure 2.3: Relationship between extraversion and neuroticism in the sample.

Predictor	<i>b</i>	95% CI	<i>t</i>	df	<i>p</i>
Intercept	12.08	[10.99, 13.17]	21.75	1417	< .001
Extraversion	-0.06	[-0.14, 0.03]	-1.25	1417	.211
Volunteeryes	2.52	[0.78, 4.25]	2.84	1417	.005
Extraversion × Volunteeryes	-0.18	[-0.31, -0.05]	-2.68	1417	.008
